Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6 "and/or" is an improper form of the alternative making the claim indefinite.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, 7-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee '716.

Lee '716 discloses in figures 1-5 a switch device operable in two steps for operating a vehicle window including a first switch and a second switch formed by traces 14 and domes 16; a button 40, inclinable in a first direction and a second direction, for activating the first and second switches; and a pusher 26 arranged between the button and the first and second switches and being movable when the button is pushed. Inclination of the button in the first direction to the first operation position moves the pusher to solely activate the first switch.

Further inclination of the button in the first direction to the second operation position moves the pusher to activate the second switch in addition to the first switch. Inclination of the button in the second direction to the third operation position moves the pusher to solely activate the second switch. Further inclination of the button in the second direction to the fourth operation position moves the pusher to activate the first switch in addition to the second switch.

The pusher includes first and second switch operators 34 facing towards the first and second switches for activating their respective switches. The button includes first and second pushing portions 54 and 56 located at the top of the pusher in correspondence with the first and second switches. The load required for activating the first switch is substantially equal to the load required for activating the second switch. The first and second domes 16 have substantially the same shape and size. The pusher has a shape that is substantially symmetrical about its centerline and the first and second pushing portions of the button push the pusher at positions equally spaced from the centerline of the pusher.

Allowable Subject Matter

4. Claim 11 is allowed.
5. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2832

6. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee '361, Kossakowski, Geppert et al, Rudolph et al, Hoang et al, and Komatsu et al teach various switch devices operable in two steps.
